this book includes a complete list of the churches and institutions 746 churches and 529 theological schools that today claim for themselves the heritage of the protestant reformation and provides basic information on each of them

english text with spanish german and french translations this volume presents the policy statement on ecumenical commitment of the evangelical lutheran church in america adopted in 1991 by the elca s second churchwide assembly

the new churches of europe is primarily concerned with that one room in each religious complex which constitutes the rationale of its being the room for worship ancillary adjuncts provided for educational and social activities offices quarters for priest or minister etc generally are omitted as being peripheral to the far more trying task of the design of the nave moreover the book does not explore in detail except where pertinent building techniques or construction nor does it go into costs either on an overall or cubic basis such factors though admittedly important vary so much from country to

country and can be so misleading that it was thought wiser given limited space to concentrate on the message of the forest and only nod to the trees the author's original intent was to include at least twenty more churches and to call on parts of many others in substantially illustrated analytical sections of the introduction however the severe economics of today's publishing prohibited this deep apologies are sincerely extended to those kind architects who generously sent requested material yet whose churches at the last minute and for reasons that had little to do with quality could not be included
